## ABOUT THE INTENSIVE APHASIA PROGRAM

Every year another 80,000 people acquire aphasia. This means that about two million people today have lost some of their prior ability to understand and speak easily.

Aphasia takes away language skills but not intellect. Communication therapy aims to unmask that intellect and allow persons with aphasia to express themselves more freely.

### Program Goals

- Provide opportunities to communicate ideas.
- Increase the efficacy and efficiency of communication.
- Improve willingness to participate in conversation.

### Therapy Sessions

Therapy sessions will be held 3 days a week, Tuesdays through Thursdays from 11:15 AM to 1:45 PM. We will start May 28 and end June 20, 2024.

### Fees

Intensive services are free of charge, with the exception of a \$50 materials fee that is due with your application in order to be considered.

---

---

## ENROLLMENT INFORMATION

The program is designed for adults with aphasia of any severity level from mild to severe. A recent evaluation is required so that we may individualize treatment. Fax or mail any recent evaluation. Please call 716-878-3530 to schedule an evaluation, if you have not been evaluated in the last year.

## TREATMENT PROGRAM

Participants will receive 2.5 hours of treatment 3 days a week, of which 1 hour is individual or in a group of 2 and 1.5 hour is small group work.

We will provide an appropriate multiple modality treatment and a treatment that requires using spoken language only. These treatments aim to improve speaking and overall participation in conversation.

---

## ABOUT THE SPEECH-LANGUAGE-HEARING CLINIC

Established in 1956, the clinic is affiliated with SUNY Buffalo State's Speech-Language Pathology Department, which is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association (ASHA).

Services are provided by graduate students under the direct supervision of faculty and professional staff members. Supervisors are licensed by New York State and hold the Certificate of Clinical Competence from ASHA.

Traditional clinical services are also available. Please call for more information.

## About Christina Mule'

Christina Mule', M.A., CCC, SLP/L is a clinical supervisor and instructor at Buffalo State University. She specializes in neurogenic communication disorders, voice, swallowing disorders, and facilitates a weekly aphasia support group.
